

# AUTOMATION OF ENERGY SYSTEMS

Alberto Leva

Milano, July 26, 2012

Dear all,

here are the results of the test that took place July 20, 2012, those of the projects delivered to date and not yet registered, and the final exam scores for those who completed both the project and the test. Concerning the registration procedure, we shall proceed as follows.

Those who got a sufficient grade in the test and handed in the project will find herein both results and the final score, which will be uploaded on the Poliself. If those people are satisfied with the result they do not need to take any action and the final score will be registered. If on the contrary they are not satisfied with said score, they have to "refuse" it by using the web standard procedure, and please come to my office hours and discuss.

Those who got a sufficient grade in the test but did not yet hand in the project will be marked as "absent" on the Poliself. When they hand in the project, those people have to register for the first test session available and take no further action; the project will be evaluated and things will proceed as per the previous point.

Those who did not get a sufficient grade in the test will have a "RM" on the Poliself. This does not result in any restriction on coming to the next tests.

As a general rule, one can repeat the test as many times as he/she wants. However, showing up to a test session and *starting* the exam cancels any previous test score. As for the project, the idea is that unless something really exceptional happens, a person or a group should deliver it only once. Remember that you can come and discuss the project before handing it in, and that the idea is that you see the project delivery pretty much like that of a professional work.

For any clarification and/or discussion, just come to my office hours.

Best,

Alberto Leva

## Results of the written test of July 20, 2012

<b>Reg. No.</b>	<b>Result</b>
755021	25
764493	19
768577	RM
